  - *Research projects in human resource management, quality and financial management, environment, workplace safety, energy efficiency and social responsibility... etc.*

Reference in the development of

TEACHING

LATEC, linked to the School of Engineering at UFF, has the mission of contributing to the economic, environmental, and social development of Brazil.

Latec
Universidade Federal Fluminense

PhD

The Doctoral Program in Sustainable Management Systems is the natural evolution of the professional, academic, and teamwork skills of the faculty members of the Professional Master's Program in Management Systems. These faculty members have formed an interdisciplinary research team at the UFF School of Engineering since 2000.

GET TO KNOW

MASTER'S DEGREE

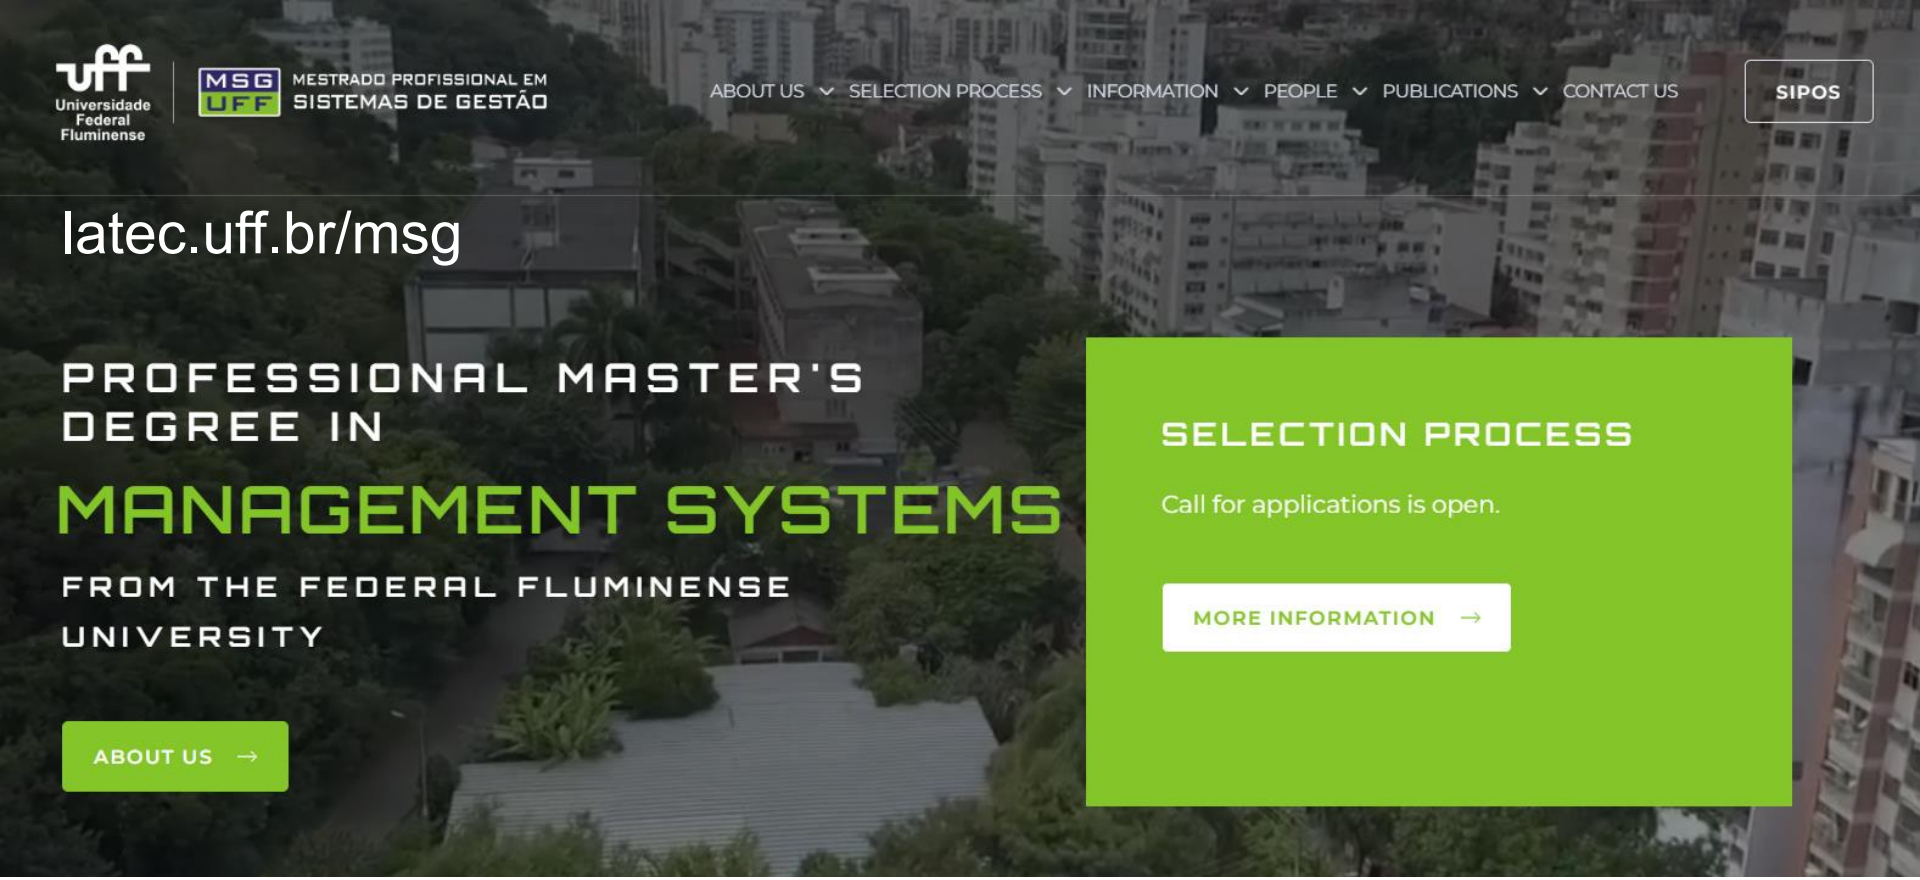

The Master's program in Management Systems is multidisciplinary in nature, aiming to encourage reflection on organizational management models in order to ensure a safe production process regarding the protection of assets/property, responsible and ethical conduct, and environmental impact.

GET TO KNOW

MBA AND SPECIALIZATION

The MBAs and Specializations at LATEC UFF aim to provide continuity to academic training. The courses are developed through a blend of academic and professional knowledge, and learning will take place in a dynamic and participatory manner.

Lato Sensu Programs (MBAs and Specializations)

OUR MBA AND SPECIALIZATION COURSES

MBA

Lean Production Six Sigma

To prepare professionals for the Implementation of Lean Production Six Sigma, aiming to improve process performance.

MBA

Sustainable Business Management

To train professionals with a strong background in Social and Environmental Management allied with strategic management and market vision.

MBA

Total Quality Management

Develops and disseminates advanced Management concepts: Integrated Systemic Vision, Total Quality and Ethics.

MBA - DGA

People Management

The key to the future lies in relationships and people. Learn strategies for developing talent and preparing teams and leaders.

MBA - DGA

Energy Management and Energy Efficiency

It trains professionals to be able to carry out Planning, Control, Development of Energy Efficiency Programs, Consulting and Energy Audits.

SPECIALIZATION

Production Engineering

It prepares professionals with skills in advanced Production Engineering techniques, as well as expanding professional performance in Production planning, operation and control.

SPECIALIZATION

Occupational Safety Engineering

It trains professionals capable of intervening in the production process of industries and companies with the capacity to design, develop and implement Quality, productivity improvement, Operational Envonmental Management programs.

MBA

Financial Economic Engineering

It trains professionals in Corporate Finance with a full understanding of the structure and functioning of markets, enabling their use to reduce capital, production and risk costs.

MBA - DGA

Construction Management and Sustainability

It allows students to learn about the various techniques, methodologies and technologies that enable them to design, manage and evaluate buildings and their socio-environmental impacts.

MBA

Strategic Management of Production and Maintenance

It prepares professionals for the demands of the globalized market and the current technological environment, which require that Maintenance and Production objectives be compatible and harmonized to achieve higher levels of competitiveness.
